## DETAILED ACTION

### *Claim Objections*

1. Claims 4, 10-13 are objected to as being drawn to compounds in the context of a product-by-process claim format. The objection is based on the fact that the compounds produced by the process are definite as to their meaning. As such, claims to the compounds can stand-alone. Product-by-process claim language is reserved for situations where the compound cannot be claimed in a definite manner. The instant application does not fall into this category, as the compounds are definite. Further, there is no showing that the process of making imparts new and unobvious properties to the compounds themselves.

Therefore, product-by-process claims 4, 10-13 will be treated as compound claims for the purpose of this examination.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-24 rejected under 35 U.S.C. 102(b) as being anticipated by EP-957,173 or Higashiyama et al. (US Pat. 6,117,905) or Kawashima et al. (US Pat. 6,280,982) or Kawashima et al. (US Pat. 5,322,780).

All four references supra teaches the production of a microbial fat or oil having a lowered unsaponifiable matter content and increased unsaturated fatty acid content with the nitrogen source content typically range from 0.01 to 5%. The parameters in the dependent claims are also taught in the references as shown in pages 2&3 of EP'173, cols. 2-5 of US'905, cols. 3-4 of US'982, and cols. 2-4 in US'780.
